| PD020K | 20kg | PH Up Powder |            |

## AQUARIUM SALTS

Add 1 teaspoon or 5 grams to 8 Litres of Water. This will raise the salinity for the many fish that require extra sodium, such as Live bearers and many Australian Native species.

This will also help prevent infections and aid in the healing process.

|        |      |                |            |

| ACA010L | 10litre | Conditioner & Clearer Aquarium |            |

## ALGAE STARVER FRESH WATER Liquid Phosphate Remover

Liquid Phosphate remover, reducing the phosphates to such a low level that it starves the algae causing it to perish. Controls the Algae and leaves you with an algae free aquarium

Add 5 ml to 100lt of water of water every 2 to 3 days until Phosphates are under control. Then add the maintenance dose every 2 weeks

|         |         |                                   |            |
|---------|---------|-----------------------------------|------------|
| ASA125M | 125ml   | Phosphate remover / Algae Starver | 48 pr Box  |
| ASA250M | 250ml   | Phosphate remover / Algae Starver | 36 pr Crt. |
| ASA500M | 500ml   | Phosphate remover / Algae Starver | 24 pr Crt. |
| ASA001L | 1litre  | Phosphate remover / Algae Starver | 12 pr Crt. |
| ASA002L | 2litre  | Phosphate remover / Algae Starver |            |
| ASA005L | 5litre  | Phosphate remover / Algae Starver |            |
| ASA010L | 10litre | Phosphate remover / Algae Starver |            |

(1 litre treats up to 20,000 litres of water)

## ALGAE STARVER MARINE Phosphate Remover For Marine Reef & Fish Tanks

A Coral safe liquid Phosphate remover, reducing the phosphates to such a low level that it starves the algae causing it to perish. Controls the Algae and leaves you with an algae free aquarium

Directions: Add 5 ml to 100lt of water of water every 2 to 3 days until Phosphates are under control. Then add the maintenance dose every 2 weeks

|         |         |                          |            |

| ASM005L | 5litre  | Algae Starver For Marine |            |
| ASM010L | 10litre | Algae Starver For Marine |            |

(1litre treats up to 20,000 litres of water)

## NO MORE BLACK BEARD

Black beard can be a virulent problem that occurs in many planted aquariums. This can result in poor plant growth. When Bearded Algae becomes a problem, to get lush green plant growth you should add No More Black Beard to Aquariums and Ponds. Directions: After a major water change of 30 to 40% For 1st dose add 5ml for each 50lt of water, then add 1ml pr 40lt every 2 days for 1 to 3 weeks
